

16 March 2021

Dear Senior School Parents and Guardians

UPDATE ON TWICE WEEKLY COVID-19 TESTING AT HOME FOR SENIOR SCHOOL PUPILS

This week, pupils are moving to twice weekly, rapid COVID-19 testing at home. This is following their first three supervised tests on site at school.

Up to 1 in 3 people who have COVID-19 have no symptoms and could be spreading it without knowing. Getting into a regular habit of testing twice a week will help stop the virus spreading, keeping your family and friends safer.

We will be sending home COVID-19 testing kits with your child from today. Please make sure your child tests themselves **twice a week, 3-5 days apart, in the morning before school if possible and, if not, the evening before.**

Your child should also **continue testing twice a week, at home, throughout the Easter school holidays.**

Tests are free of charge. Pupils will receive 9 tests with a leaflet on how to take the test and report the results. The tests will last them from this week, until the first week back at school after the Easter holidays, at which point they will receive their next batch of tests.

If your child has not been tested at school yet, then please get in touch with us so that we can arrange a time for them to be tested on site, before beginning home testing.

This does not replace testing for those with symptoms. If you have symptoms you must self-isolate immediately, book a PCR test and follow national guidelines.

When to start testing

Your child should begin home testing 3-5 days after receiving their last test in school. For most pupils this will mean starting home testing this week (w/c 15 March 2021).

Taking the Test

Pupils should take the test, before coming into school, twice a week. Testing should continue throughout the Easter holidays. We will give pupils a leaflet with instructions on how to do the test with the kit. There is also a useful video to show you how to take the test [here](#).

[Help and support is available](#), including instructions in different languages on how to test and report the results and a video showing you how to take the test.

There is no need to keep used test equipment after the test result has been reported. You can put it in your normal bin (household waste).

This does not replace symptomatic testing. If you have symptoms, you should self-isolate immediately, book a [PCR test](#) and follow [national guidelines](#).

What should you do after the test?

You need to report your result to both [NHS Test and Trace](#). It is really important that results of test are reported online straight away, even if your child's result is negative or void. It's easy to do at www.gov.uk/report-covid19-result.

Results can also be reported via telephone by calling 119 (free from mobiles and landlines). Lines are open every day, 7 am to 11 pm.

You will also need to tell St Chris the result, if it is positive, negative or void. To do this, please email St Chris at covid.testing@stchris.co.uk and put the result of the test in the SUBJECT of the email ie. NEGATIVE or POSITIVE or VOID (and the name of the pupil in the body of the email).

Positive Test

If anyone tests **positive you, your household, any support bubbles you are part of** should self-isolate immediately in line with NHS Test and Trace guidance for 10 days. You should [order a confirmatory PCR test](#). Positive results should be reported to [NHS Test and Trace](#) and to St Chris via covid.testing@stchris.co.uk as above.

Negative or Unclear/Void Test

If the result of the test is **unclear (void)** you should do another test.

Negative and void results should also be reported to [NHS Test & Trace](#) and to St Chris via covid.testing@stchris.co.uk as above. A negative result does not guarantee that you are not carrying the virus. So, you should continue to follow social distancing, and other measures to reduce transmission such as wearing a face mask and regularly washing your hands and observing social distancing.

If you or anyone in your household gets symptoms of the virus you should follow [national guidelines on self-isolation and testing](#).

Testing for parents, households and bubbles twice a week

A reminder that regular rapid testing is now also available for parents, their households and support or childcare bubbles. The government is encouraging all families to participate in twice weekly testing to help stop the spread. Parents and other adults in the household can access tests by:

- Ordering tests online www.gov.uk/order-school-household-tests
- Getting an assisted test at work, if it is available
- Attending a test site to get tested (where you will be able to see how to take the test) or pick up tests to do at home.

To find out more on school household testing visit [Households and bubbles of pupils, students and staff of schools and colleges: get rapid lateral flow tests - GOV.UK \(www.gov.uk\)](#)

We continue to encourage everyone to take part in regular Covid-19 testing.

Why take part

Taking part in testing is voluntary and all pupils will be able to attend school whether they take part in testing or not. We are strongly encouraging all pupils to take part. Testing at home will allow your child and other pupils to attend school as safely as possible.

Please contact Martin Scoble, our COVID Coordinator, if you have any questions or concerns about home testing by email martin.scoble@stchris.co.uk

Thank you for your support.

Emma-Kate Henry
Head

Some Frequently Asked Questions

Do I need to give consent?

Pupils and parents do not give written consent to take part in the home testing programme. Please read the information below on how personal information and test results are shared and [St Chris COVID-19 Privacy Statement](#).

Once you open the kit you should take and report the results of the tests to [NHS Test & Trace](#) regardless of the result (positive, negative, or void).

You will also need to tell St Chris the result, if it is positive, negative or void by emailing covid.testing@stchris.co.uk and putting the result of the test in the SUBJECT of the email i.e. NEGATIVE or POSITIVE or VOID (and the name of the pupil in the body of the email)

Can my child take the test themselves?

Pupils aged 18 and over should do the test themselves and report the result, with help if they need it.

Pupils aged 12-17 should do the test themselves with adult supervision. The adult may help the pupil to take the test if they need support.

Pupils aged 11 must be tested by an adult and the adult must report the result.
Reporting problems or issues with testing

If there is an issue with the test kit, for example something is missing, please report it by calling 119 and please also tell St Chris.

If an accident or injury happens whilst using the test kit, please seek medical care by calling 111 (or 999 if it is an emergency). Please also report what happened using this website: <https://coronavirus-yellowcard.mhra.gov.uk/>

What type of tests will be used?

We will be sending home Lateral Flow Device (LFD) tests. They are a fast and simple way to test people who do not have symptoms of COVID-19, but who may still be spreading the virus.

The tests are easy to use and give results in 30 minutes.

Further information: <https://www.gov.uk/guidance/understanding-lateral-flow-antigen-testing-for-people-without-symptoms>

Are LFD tests accurate?

Lateral Flow Devices identify people who are likely to be infectious. These individuals tend to spread the virus to many people and so identifying them through this test is important.

These tests have been widely and successfully used to detect COVID-19 in asymptomatic individuals and are approved by the Medicines and Healthcare products Regulatory Agency (MHRA). The speed and convenience of the tests supports the detection of the virus in asymptomatic individuals, who would not otherwise have got tested.

The tests are highly specific, with low chance of false positives. They are also very sensitive and are able to identify the majority of the most infectious yet asymptomatic individuals. Extensive evaluation has been carried out on the tests and it shows that they are both accurate and sensitive enough to be used in the community for screening and surveillance purposes.

It is important to remember that these tests are only an aid to help stop the spread of the virus and you should continue to follow other guidance such as on wearing face coverings and social distancing.

How are LFD tests different to PCR tests?

There are 2 main types of test to check if you have coronavirus:

- polymerase chain reaction (PCR) tests check for the genetic material (RNA) of the virus in the sample - you send the sample for processing at a lab
- lateral flow device (LFD) tests detect proteins called 'antigens' produced by the virus

LFD tests give rapid results, in 30 minutes after taking the test.

What does it mean if my child has a positive result?

If your child has a positive antigen LFD test result they, their household and any support bubbles they are part of should self-isolate immediately in line with [NHS Test and Trace guidance](#) for 10 days. You need to report your result to both [NHS Test & Trace](#) and to St Chris via covid.testingf@stchris.co.uk.

You should order a confirmatory PCR test if you are testing at home. You can [book a test here](#).

What does it mean if my child has a negative result?

A negative result does not guarantee that your child is not carrying the virus. So, you should continue to follow social distancing, and other measures to reduce transmission such as wearing a face mask and regularly washing your hands.

What if my child has a void result?

If the result of the test is unclear (void), they should take another one. If the next test is also void, your child should take a PCR test. You can [book a test here](#).

All test results need to be reported to [NHS Test & Trace](#).

Do I need to send the test to a lab?

No. The LFDs supplied do not need to be sent to a laboratory to get a result and can give a quick result in around 30 minutes. Guidance on self-testing is contained in the 'Instructions for Use' leaflet, which comes with the test kit. There is also a useful video to show you how to take the test [here](#).

Can I or someone else in my household use a test kit sent home from school?

No, however whole families and households with primary school, secondary school, and college age children, including childcare and support bubbles, will be able to test themselves twice every week from home. This testing can be accessed through the following channels:

- get a rapid test at work, through workplace testing. Ask your employer for more information
- attend a test site to get tested where you will be able to see how to take the test or pick up tests to do at home (you can find your nearest test site via the postcode checker www.gov.uk/find-covid-19-lateral-flow-test-site or check your local council website)
- collect tests to do at home, find your nearest collection site [COVID Test Finder \(test-and-trace.nhs.uk\)](https://www.covid-19-test-finder.nhs.uk)

If these options are not possible, there will be a supply of rapid tests for order online for people who need them the most. More information can be found on www.gov.uk/order-coronavirus-rapid-lateral-flow-tests

There is [more information available about testing for households and bubbles of students](#).

How will personal information and test results be shared?

When your child takes a Lateral Flow test, you need to report the result. This is so that their test result can be traced, which means that you need to share some information about your child.

You need to tell the Department for Health and Social Care (DHSC):

- your child's name
- your child's test result
- the reference number on the test Kit

You will also need to tell your child's school their test result.

Under UK law, your child's school can collect and store test result data because it is in the 'public interest'. This means that your child's data helps us to stop the spread of the virus, and to keep your children in school. For example, we will tell your child to self-isolate if they get a positive test result.

Schools and colleges will only share information with the Department of Health and Social Care (DHSC) if the test kits used are found to be faulty. If this happens, DHSC will use our information to contact people who used the faulty tests, so that they can be tested again. This will ensure that testing is accurate and helps keep us all safe.

When you report test results online, you are sharing information with DHSC. They may share the information with your GP, local government, NHS, and Public Health England. This is so that they can offer your family health services and guidance if your child needs to self-isolate. They might also use your child's data anonymously (without their name or contact information) to research COVID-19, and improve our understanding of the virus.

For more information on how personal data is used for testing please see the [St Chris COVID-19 Privacy Statement](#).
